## **DETAILED ACTION**

### ***Election/Restrictions***

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions, which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claims 1-32, drawn to system for elastic properties measurement.

Group II, claims 23-32, drawn to an impacting device for causing vibration.

Group III, claims 33-37, drawn to an acoustic detection device

Group IV, claims 38-46, drawn to a method for determining the resonance period of materials.

Group V, claim 47, drawn to method for characterizing cracks.

2. The inventions listed as various Groups do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

Independent claim 1 and its dependent ones, disclose a system for the elastic properties measurement comprising an impacting device and acoustic detection device. The main problem being solved by Group I is to measure the elastic properties of materials.

Independent claim 22, and its dependent ones disclose an impacting device for causing vibration. The problem solved by this technique is merely defining by reciting the impacting device.

Art Unit: 2855

Independent claim 33, and its dependent ones disclose an acoustic detection with shock detection container. The technical feature of this claim, therefore, defines an acoustic detection device.

Independent claim 38, and its dependent ones disclose a method for determining the resonance period. A technical features different from technical features in other Groups.

Finally, independent claim 47, discloses a method of charactering cracks, which has nothing to do with limitations and technical features of claims limitations of the other Groups.

Therefore, all technical features defining the invention of claims 1 and 22, 33, 38 and 47 are different. They hence, do not have common feature. They further differ from each other to such an extend that they are not considered as corresponding technical features.

3. Affirmation of this election must be made by applicant in replying to this Office action. Applicant also is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
